

CHILDREN'S SURE HOUSE SCHOOL WALL PERIMETER FENCE (SWAPF) PROJECT

On behalf of Children's Sure House, I am pleased to submit this (€5, 986) proposal requesting for the "CHILDREN'S SURE HOUSE SCHOOL WALL PERIMETER FENCE (SWAPF)" project.

This project was aimed at consolidating and improving together with the beefing up security due to the deteriorating learning environment due to urbanization and increasing housing explosion. Potentially we will work with 550 CSH community members (the majority of whom are OVCs who are HIV/AIDS infected and affected) as well as affect their communities and the lives of their family members.

The main focus being on school perimeter wall fence around CSH school complex in Kiwangala..

Through this project, we strive to beefing up security and safety. The community will contribute time, leadership, decision-making, labour, and some materials

The CSH (school) community background consists of 550 HIV/AIDS infected orphans, and helpless vulnerable children and adolescents who cannot concentrate to their learning due to the open atmosphere exposing them to the polluted environment due to the housing and urbanization in the area.

CSH proposes to work with teachers and non-teaching staff to focus on building a perimeter school wall fence ing safe, clean and quiet learning environment at all times at the school site.

The community is also experiencing a problem of insecurity, trespass and lack of privacy. This has forced our school authority and Children's Sure House to look and seek for additional alternative sources of funds

Building this Perimeter wall fence around the school will provide safety, privacy and a safe learning environment thus achieve an improved quality of life for the entire community unto generations, thus a trigger effect into a viscous circle of improvement of education, livelihood and development.

Goal and Objectives

The Kiwangala Children's Sure House community is also experiencing a problem of insecurity and trespass from the encroaching social, housing and gross overgrowing estate/ building industry. This has forced our school authority and Children's Sure House to look and seek for additional alternative sources of funds. There are an overwhelming population pressure and high demand of housing infrastructure in Kiwangala trading centre. The existing barbed wire fence structure around the school currently cannot prevent and stop the threatening growing demand for rental housing and rapid population explosion cannot cater for the badly needed safety and security for the educational institution,

And it is an unsafe situation in Kiwangala where school and the neighbouring rapidly growing village are heavily contrasting at all times during the day.

Goal: Safety and Livelihoods of school children in Kiwangala are improved

- Objectives:**
- 1) Assuring Privacy and avoiding trespass with noise pollution to the school beneficiaries.**
 - 2) Providing the poor school orphans and children access to safety and security.**
 - 3) Eliminating and controlling of theft and burglary due in-breakages.**
 - 4) Enhancing, strengthening and improving the quality of children's health and safety.**

The overall goal of CSH WASH is to improve and beef up security and livelihoods of the School population in the Kiwangala and security of the school property.

Target groups: CSH's proposed WASH project will target current areas of operation of the CSH OVC program poor ignorant households that are denied, or have no access to proper toilet services, due to their conditions of vulnerability and poverty. CSH WASH intends to reach the target groups through the already built structures, which, as the partner, will coordinate and implement the project.

Mitigation

We shall have monitoring and evaluation sessions throughout the implementation process.

There will be open lines of communication throughout this project.

Differing views, discussion, questions, and concerns are always welcome.

We shall have a suggestion boxes at our school

We would request you to donate in order to finalize the construction of the project. If we get a donation of Five thousand nine hundred eighty-six Euros(€5, 986) as shown in the breakdown here below. We humbly request for your contributions.

LAST PHASE OF THE CSH WASH PROJECT
